

Company profile

Hawk IVO is the brand of Hawk IVO GmbH, based in Neustadt an der Aisch, Germany. The company develops software for planning, operational work and agent-supported workflows. Its publicly presented product family includes Hawk IVO Force, Hawk IVO Plan and Hawk IVO Scheduler. Since 20 October 2026, the company and its products have appeared under the name Hawk IVO.

Company profile

Hawk IVO brings together software for human work and agent-supported workflows. The brand belongs to Hawk IVO GmbH, based in Neustadt an der Aisch, Germany. The company develops software for planning, operational control and data-informed decisions.

Hawk IVO Force organizes agents, skills, knowledge and controlled system actions. Software vendors can embed the agents as a white label under their own brand in software of any kind. Hawk IVO Plan provides planning logic, rules and optimization and presents the plan in visual workspaces for planners and teams. Hawk IVO Scheduler is a high-performance library that displays time, resource and hierarchy plans with millions of objects in the browser; the planning logic stays in the host software.

The offering serves companies organizing work in their own operations and software vendors integrating selected capabilities into their applications. Hawk IVO combines software with experience in building and integrating agent systems. Features, operation and services are agreed for each use case.

With the new name, the products were renamed as well: getaiTwin became Hawk IVO Force, getaiPlan became Hawk IVO Plan and Scheduler Ultra became Hawk IVO Scheduler; the getaiSpace interface is now part of Hawk IVO Plan. The website is available at hawkivo.com. The company now trades as Hawk IVO GmbH, formerly Hawk Intelligent Technologies GmbH. Existing contracts remain unchanged.
